Baby wipe with plastic open

The wet baby wipes come in a plastic packet, with a hard plastic 'lid' on top. The plastic lid is easy to open which is always good if you have nappy's to change, just clicks open and shut and easy enough to do one-handed. The lid functions well and stays shut to stop wipes drying out. On opening there is a peel-off security seal sticker remove this and pull out your wipes easy. Better design than some packs which just have a resealable plastic sticky tab - which usually loses its stickiness and your wipes dry out.

These baby wipes with plastic open are soft and strong and moist enough to do whatever job you have to do. These baby wipes are also enriched with baby lotion and contain aloe vera to help care for delicate skin. Even if you don't have a baby or small child things have many uses. It is good for cleaning yourself, great for giving any and all surfaces a quick once over, Wiping the dog, Cleaning up parrot poop, general wiping and cleaning of anything and everything really - is also a bike rally/festival essential.
