Compressed facial mask

The compressed facial mask is used for face care, which is made of 100% viscose or nature silk ingredient. This type of facial skin care products doesn't contain any chemical components and has the features of soft, absorbable and biodegradable. Compressed facial mask can absorb extra grease on the skin and resist the nutrient vaporized and loss.

It can be easily carried. When you want to use, just simply put the compressed mask into the nutrient liquid, then it will open and grow rapidly, then a full mask comes out. The nonwoven compressed facial mask is used widely. The efficacy of facial care will be several times than normal cosmetic care.

The working principle of the mask is: By preventing the skin of face contact the surrounding to raise the skin temperature to open the pore, interpenetrate the sebum and remove the aging cutin.
