**Cosmetic pads**

Most of the people don't want to use the wet towels for worrying it doesn't meet the sanitary standard or worrying the contained antiseptic will be bad for our skin. So, most of the people prefer paper towels to wet tissue even it has a lot of lint left behind using.

Our cosmetic pads are strong, do not split and leave no fibres on the skin. The non-woven material makes these cosmetic pads an excellent fiber-free choice for cosmetic pads. The cosmetic pads have high ability of adsorption. And it have definite thickness that can remove the color or makeup easily. Our cosmetic pads are very soft and delicate. These self-adhesive polyurethane pads can help make the scarred skin appear more natural in color and texture, as well as help to flatten raised scars. It is effective on any part of the body, including the face, and can be worn overnight, while sleeping.
